Built on a Strong Foundation

Gripping Solutions

Linear Positioning Solutions

Rotary Positioning Solutions

Clamping Solutions

CRL Remote Handling Solutions

Robotic Tooling Solutions

Destaco, a Dover company, is a global leader in the design and manufacture of high-performance automation, workholding and remote-handling solutions. The company serves customers in a variety of end-markets, including the automotive, life sciences, consumer packaged goods, aerospace, industrial and nuclear sectors.

Built on a legacy of more than 100 years, Destaco offers a comprehensive portfolio of products designed to engineer precise movement, placement and control solutions that drive productivity and uptime for manufacturers around the world. The Destaco family of products consists of industry-leading brands such as Destaco Manual Clamps, Power Clamps, and End Effectors; CAMCO™ and Ferguson™ Indexers; Robohand™ Grippers; and CRL™ Manipulators and Transfer Ports.

Destaco is based in Auburn Hills, Michigan, U.S.A. The company has more than 800 employees with 13 locations, in 9 countries, across the Americas, Europe and Asia.

Destaco is part of Dover Corporation, a diversified global manufacturer with annual revenues of \$7 billion. The company delivers innovative equipment and components, specialty systems and support services through four major operating segments: Energy, Engineered Systems, Fluids, and Refrigeration & Food Equipment. Headquartered in Downers Grove, IL, (NYSE: DOV)

Focusing all our Resources

New Product Development

DESTACO has dedicated resources to design and build the next generation of products and solutions

Customer and Technical Service

DESTACO has industry leading global support to address any product and application concerns you may have

Design Tools

DESTACO provides an extensive CAD library, sizing software, and online tools to support our global customers

Our Insight Working for You

Application Engineering

We utilize our expertise and complete portfolio of products to create solutions that fit our customers' needs and applications

Custom Solutions

If our off-the-shelf solutions don't fit, we will partner with our customers to develop products that will

End Effector Solutions

Speed Matters

DESTACO end effectors are designed to help you move parts faster in today's production line by using high strength, lightweight aluminum modular components, durable vacuum cups and the fastest venturis on the market.

- Robotic load and unload
- Geo-docking and fixture
- Tri-axis press transfer
- Tandem press transfer
- High-speed and traditional crossbar press transfer
- Bag and box palletizing
- Molding part unload

CONCEPT-TO-COMMISSION SOLUTIONS AND SUPPORT

The launch of our new accelerate light weight tooling in 2013 was specific for the new generation fast press lines but usable as backwards retrofit to all older standards. Today, more customers are asking for an integrated digital supply package. Digital build allows us to manufacture tools without a stage sample or 2D drawings.

We partner with our customers to provide designs for all press types:

- Servo press
- Robot crossbar
- Feeder crossbar
- Speedbar
- Robot tandem
- Tri-axis transfer

Digital Press Shop and Virtual Assembly

- 3D model design and collision checking of die, press, automation, and tooling
- Digital simulation using Delmia
- Precise build capability using robot technology^①
- Tool qualification using metrology^①
- Installation using own physical simulation and install teams

^① Where Available

CUSTOM END EFFECTOR SOLUTIONS

Custom Solutions for End Effector Tooling Systems

DESTACO has several families of end effector components that are designed to be used together to create an unlimited number of material handling solutions to fit any application and market. Below are examples of solutions designed to customer specified design criteria. If there is no part that fits your needs, we will partner with you to design a part that fits.

Contact us today to get started on your custom application: solutions@destaco.com

MAKING OUR PRODUCTS SPECIAL FOR YOU

Custom Solutions for End Effector Tooling Systems

DESTACO offers three levels of modifications for customizing our end effector systems to fit our customers' specified applications. Depending on the severity of the modifications, quoting times may take longer.

Level 1 Modifications:

Standard product design with minimal modifications to existing catalog product.

- Custom mounting
- Non-standard controls
- Special coatings
- Complete design and build
- Quotes within 2 days*

Level 2 Modifications:

Application of standard components with the addition of custom designed or modifications to standard parts.

- Detailed concept or model required
- Oversized or custom mounting
- Non-standard tooling or brackets
- Complete design and build
- Quotes within 3 days*

Level 3 Modifications:

Custom applications that may consist of a combination of standard products or a complete custom design.

- Turn-key application
- Complete design and build
- Quotes within 5 days*

(*) Based on all customer supplied information ie.Part models, system layout (if required) robot or automation.

VACUUM CUPS

Vacuum Products | Durometer and Mounting Options

DESTACO Vacuum Cups are offered in different families, and may be offered in different durometers. Vacuum cups are also offered in Imperial and Metric mounting options which may vary according to the size and type of the vacuum cup.

Vacuum cups can be ordered as follows:
CPI-"MODEL"-"Mounting"-"DuRometer"

Vacuum Cup Durometers ("**DR**") (Color equals Durometer (Shore A Scale))

30

This soft durometer is useful for dryer, contoured panels. However, this durometer has less life.

45

This medium hard durometer will seal and adapt to contours well and is good for all around usage. This durometer has a longer life than the 30 durometer.

60

This hard durometer is helpful for extremely oily panels and flat surfaces such as a destacker operation. This durometer has a longer life than the 45 durometer.

PU55/PU60

This durable long-lasting polyurethane material is resistant to oils, UV light and oxygen. No dry rotting or cracking with better elastic memory.

= Durometer not available in cup style.

DIE STORAGE BLOCKS, BASES AND ROLLERS

Die Components

DESTACO has developed special urethane compounds that have been incorporated into die storage blocks that were previously made using all steel construction. The use of DESTACO Urethane Die Storage Blocks greatly reduces scratching and damage to parts and die surfaces. Our Storage Blocks can mount directly to the die or, as an option, use our steel, double-hinge, swing-away bases.

Ball Bearing Cushion Rollers

DESTACO Rollers are designed to meet the high performance needs of the industrial market. Available in cushion design where maximum protection from shock loads is required and noise, scratch and dent free service is a necessity. Rollers are made of oil and cut resistant neoprene and nitrile material, molded in four color coded durometers and are offered with or without stud mounting. DESTACO rollers protect your products!

OUR PORTFOLIO OF PRODUCTS

End Effectors (EE)

- Tool Changers
- End-of-Arm Tooling
- Vacuum Products
- Palletizing Solutions

Grippers (GR)

- Electric Grippers
- Pneumatic and Sheet Metal Grippers
- Rotates
- Slides

Indexers (IN)

- Precision Conveyors
- Dial Indexers
- Shaft and Flange Indexers
- Part Handlers

Power Clamps (PC)

- Power Clamps
- Pin Clamps and Packages
- Pivot Units
- Power Cylinders

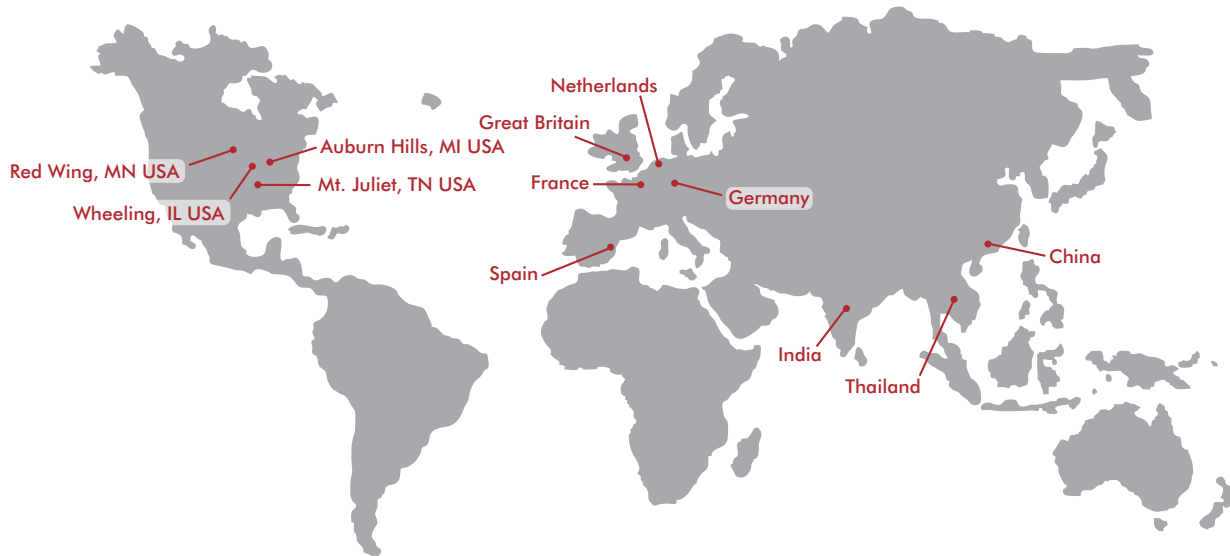

Manual Clamps (MC)

- Hold Down
- Squeeze Action
- Plunger, Hook and Latch
- Pneumatic Toggle and Swing

Sheet Metal Grippers (SM)

- Accelerate® Press Room
- Cam Type
- Toggle Lock
