**DAY-LITE® Corrugated Material Handling Suction & Vacuum Hose**

Parker's Series 8341 Day-Lite Corrugated Material Handling Suction & Vacuum Hose provides excellent heavy duty service across multiple low pressure transfer and applications. The thick rubber tube provides additional resistance to abrasive materials going through the hose, and dissipates static electrical charge for operator safety. The lightweight corrugated cover provides kink resistance for unimpeded flow, additional flexibility for easy handling and resistance to abrasion and weathering for maximum performance.

## DAY-LITE Series 8341HD Hose

- Heavily corrugated cover for greater flexibility & kind resistance
- Available in up to 100 ft continuous lengths
- Thick 3/8" innertube for enhanced life
- Static dissipative innertube
- Quick product availability
- Designed for transfer service of highly abrasive materials in application 180°F & 75psi

# DAY-LITE Series 8341HD Hose

## Markets

- ⇒ Construction
- ⇒ General Industrial
- ⇒ Municipalities
- ⇒ Local Governments

## Features & Benefits

- ⇒ Tube: Black natural rubber/SBR for abrasion resistance to 180°F.
- ⇒ Reinforcement: Multiple textile plies for strength and durability, and a wire helix for full suction capability and a path to conduct a static charge to ground.
- ⇒ Cover: Black corrugated rubber/SBR for resistance to abrasion, cuts, gouging, scuffs and weathering.
- ⇒ Lengths: Available in optional 200-foot lengths for maximum versatility in application and efficiency of inventory.

**If excavation is required, the job can be done with daylighting!**

- Exposing buried pipes & cables
- Culvert clean-outs
- Service repair pits
- Potholing
- Debris removal
- Shoring installations
- Tank cleaning
- Trenching potholes
