## Replacing Leaking Hose with Parker 201 Hose

### Problem

The customer was having issues with leaking hoses on their molding machines. A Hose broke on one of their molding machines over the weekend and their shop flooded over 2 inches. The customer needed a new, flexible, high pressure hose.

### Solution

After reviewing the situation, Exotic brought in Parker's 201 Hose, a hose that has a high temperature rating, is very flexible, and has a high PSI rating. The customer tested the hoses and have had great success. They have been in the process of updating all their machines with the new hose.

### Featured Products

**Parker 201 Hose-** A transportation hose that has a pressure range of 200-3000 PSI and is reinforced with one steel braid and one fiber braid making it excellent for rugged transportation applications. The braided fiber cover provides additional protection. The 201 hose is designed, built, and tested to meet SAE J517 100R5 / SAE J1402 All / DOT FMVSS 106 AIR BRAKE - All performance specifications.

#### Success Factors

Exotic was able to replace the customer's existing leaking hoses with a Parker product that suited the needs of the machines.

#### Customer Value

The new, flexible, high pressure hoses will avoid future leaks and flooding for the customer.
