 AUTOMATION & SUPPLY

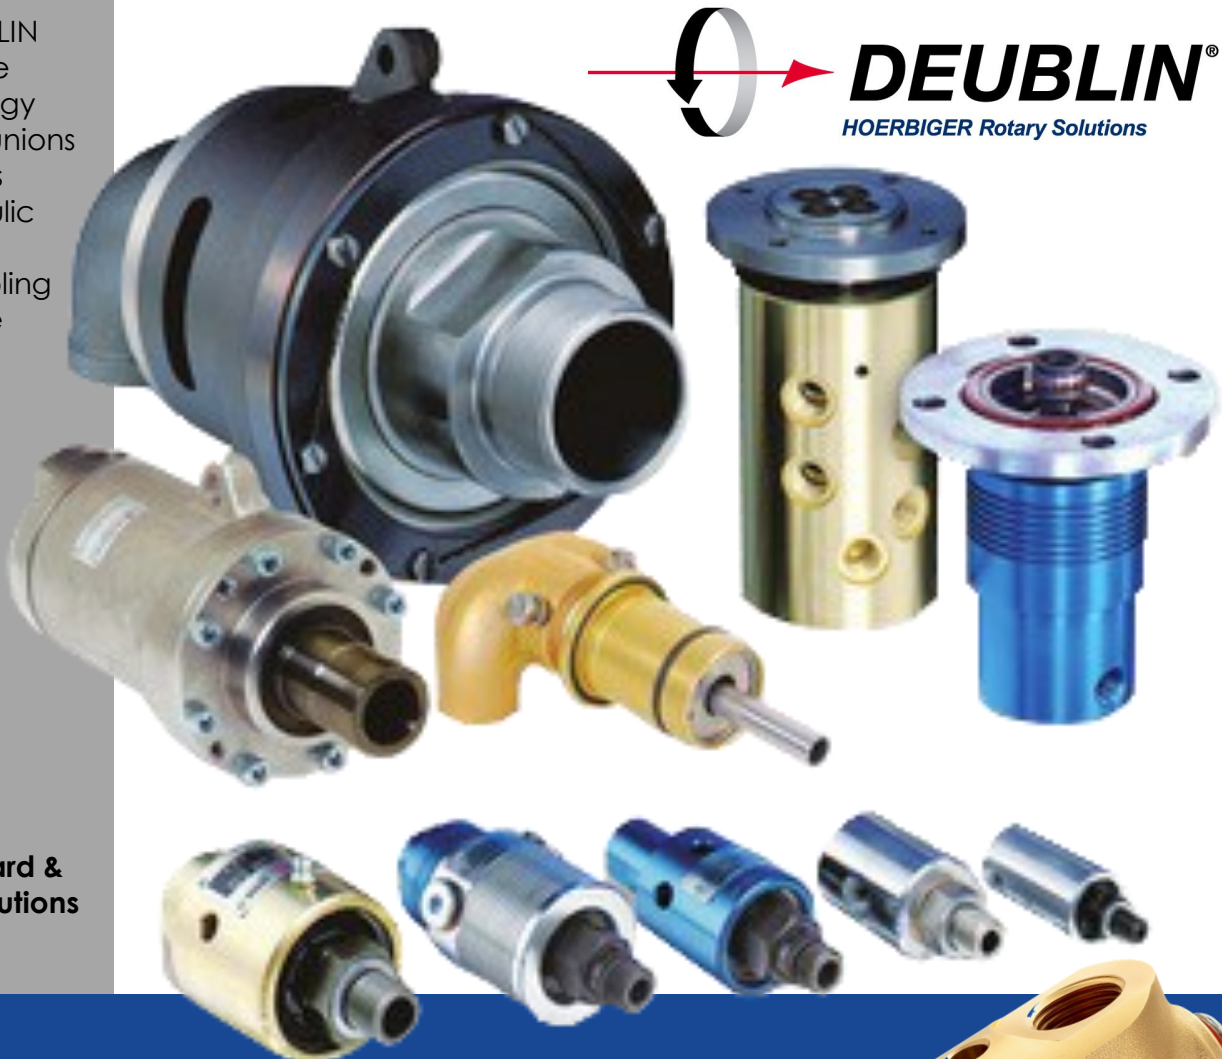

Deublin Rotary Solutions

Developed in 1945, DEUBLIN Rotating Unions are at the cutting edge of technology today. DEUBLIN rotating unions can transfer fluids such as water, thermal oil, hydraulic oil, air, compressed air, pneumatics, coolant cooling lubricants, vacuum as well as signals and electrical power via slip rings.

Industries:

- Agriculture
- Construction
- Machine Tool
- Metal Processing
- Oil & Gas
- Paper & Corrugating
- Printing & Packaging
- Renewable Energy
- Semiconductor

More than 1,500 standard & thousands of special solutions available!

DEUBLIN Rotating Unions

A rotating union is a machine component that provides the sealed transition of a fluid or fluids from stationary supply lines into/out or through a rotating machine element such as rollers, cylinders, tables, spindles, or drives. DEUBLIN builds reliable rotating unions for high performance applications.

Used for:

- Air
- Coolant
- Hydraulic Oil
- Steam
- Thermal Oil
- Water
- Multi-Media

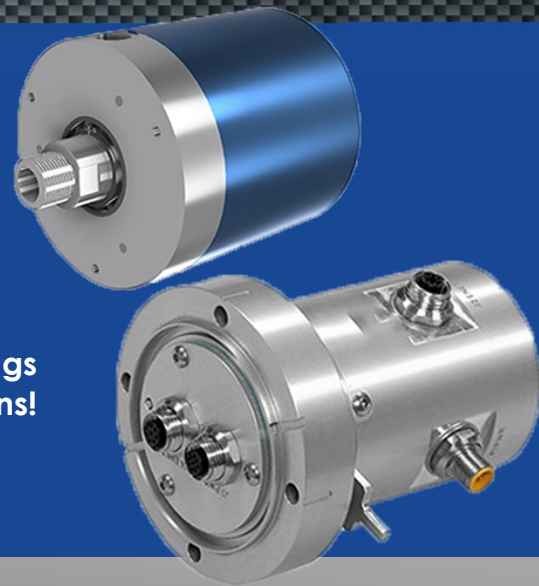

DEUBLIN Slip Rings

DEUBLIN slip rings are tested to withstand the most rugged environments and provide reliable connections 24/7.

Types:

- Standard
- Through-Bore
- Integrated Solutions
- Custom Available

DEUBLIN electrical slip rings last for billions of revolutions!

Common Applications

Flaking Rolls

Heated Rolls Plastics

Cardboard Press

Plastic Extruder

Gun Drilling

Plastic Film or Sheets
