PIPE CUTTING SYSTEM

Professional pipe cutting tools

If it needs to be cut, cut Exact.

exact
PIPE CUTTING SYSTEM

Get the Exact experience

At Exact Tools, we strive to make your job easier. We have developed a range of **powerful, safe, and easy-to-use** pipe saws that enable anyone to achieve professional-grade results right from the start. That's the Exact experience.

We guarantee that once you try Exact Tools, you will see and feel the difference.

Welcome to our world!

Exactly what you want

At the core of our revised product range is versatility. We offer solutions for various jobsite conditions and pipe materials, suitable for everything from light to heavy-duty applications. Our tools are unique, with many protected by patents.

PRO SERIES

page 6

Power and durability are the core of our Pro Series. When paired with the right blade they are built to handle heavy-duty use year after year. A package to cut and bevel cast iron pipes in one go is available.

INFINITY

page 10

Exact Infinity cuts pipe 14"-73" standard, and larger pipes with additional chain segments. **Now available also as a HYDRA version.**

CLASSICS

page 12

Easy to handle and portable saws for the jobsite.

INOX

page 14

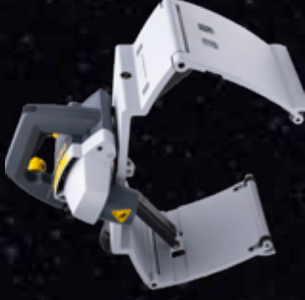

Our INOX pipe saws are designed for stainless steel and acid-resistant pipe cutting. To avoid contamination, all parts in contact with the pipe are also made of stainless steel.

BEVELLERS

page

Our bevellers use the same unique effective grip that ensures safety and provides highly precise results. They are exceptionally quick to install.

HYDRA

page

Our latest innovation Exact HYDRA is powered by hydraulics and is for cutting pipe in a trench. Cuts around, or underwater. Cuts pipe 3"-14". **Also available in INFINITY Model 14"-73" pipes.**

PIPE CUT AIR

page

Pneumatic pipe saw for situation where electricity is not available.

BLADES AND ACCESSORIES

page

Saw blades and discs, Pipe Supporter Bag and Blade Guards.

Pro Series Features

- Double the power compared to Classics
- New Feature: adjustable blade depth on 220 PRO and 460 PRO
- A traffic light system protecting the motor from overload
- Laser indicator for cutting point precision
- Also available in 230V to cut & bevel ductile/cast iron

PipeCut 220 PRO

Capacity range	1"-8" OD Pipes
Steel Wall Thickness	0.5"
Plastic Wall Thickness	1.4"
Motor	15 Amp
Weight	25 Lbs

Pro Series

PipeCut 280 PRO Light

Capacity range	2"-10" OD Pipes
Steel Wall Thickness	0.5"
Plastic Wall Thickness	1.4"
Motor	15 Amp
Weight	29 Lbs

Note: No depth guide

Standard package includes

- PipeCut 220 Pro or 280 Pro Light Series pipe saw
- Cermet 165 blade pre-installed
- Pipe support x 4 pcs
- Allen keys 2 mm and 5 mm
- Shoulder bag

ROSS TAYLOR,
RH TAYLOR
MECHANICAL, OHIO:

"Any other method feels barbaric."

The Exact saw is the most efficient way to cut pipe, either in the bench or cutting in the field. The speed and quality are unmatched."

PRO SERIES For some serious cutting

The Pro Series saws have a heavy duty motor, laser indicator, and an overload protector.

The 220 PRO and 460 PRO have a depth guide.

6 If it needs to be cut, cut Exact

exacttools.com

- Double the power compared to Classics
- A traffic light system protecting the motor from overload
- Laser indicator for cutting point precision
- Also available in 230V to cut & bevel ductile/cast iron

PipeCut 360 PRO

Standard package includes

- Exact PipeCut 360 / 460 Pro Series pipe saw
- Cermet 165 blade fitted to the machine
- Pipe supports 1 x double, 2 x single
- Allen keys 2 mm and 5 mm
- Shoulder bag
- Also available in 230V to cut & bevel ductile/cast iron

Work with precision.

PRO SERIES EXACT

INFINITY

Cutting the world's largest pipes

Exact Infinity takes pipe cutting to a whole new level. With no limits to cutting capacity for pipe outside diameters, Infinity truly means cutting without boundaries. You can handle virtually any pipe size with an outside diameter starting from 14" and up.

The system features a chain-based gripping mechanism that is as versatile as it is reliable. Thanks to the flexible chain segments, you can extend the gripping unit to accommodate pipes of any size.

INFINITY

- Cuts 14"-73"+ by adding additional chain segments
- Hydraulic version available, see page 19
- Save time and improve safety on the job site
- Also available in 230V to cut & bevel ductile/cast iron

Cermet 165, Diamond 165, TCT P190

Capacity Range	14"-73"
Steel Wall Thickness	0.5"
Plastic Wall Thickness	1.7"
Motor	15 Amp
Weight	28 Lbs

Learn more
about Infinity

Infinity standard package includes

- Exact PipeCut Infinity motor unit with Cermet 165 blade installed
- Tensioner device and device with crank
- Chain segments for attaching the saw to pipe
- Operating instructions and two shoulder bags
- Allen keys 2 mm and 5 mm
- Also available in 230V to cut & bevel ductile/cast

CLASSICS Lightweight tools for precise cutting

Classics Series pipe saws are strong but lightweight – they are easy to carry wherever you go. Our Classics saws are ideal for cutting plastic and metal pipes quickly and efficiently. A battery-powered version is also available, allowing you to work even in challenging offsite conditions.

Classics

PipeCut 170E

Capacity Range	0.6”–6”
Steel Wall Thickness	0.31”
Plastic Wall Thickness	0.55”
Motor	9.2 Amp
Weight	12 Lbs

See 170E
in action

- Standard package includes**
- Exact PipeCut 220E / 170E pipe saw
 - TCT 140 blade fitted to the machine
 - Pipe support, 4 pcs
 - Allen keys 2 mm and 5 mm
 - Shoulder bag

PipeCut 170 BATTERY

- Cuts all materials
- Completely mobile and cordless
- Lightweight
- Cuts both metal and plastic pipes
- Adjustable motor speed and constant torque

Capacity Range	0.6"-6"
Steel Wall Thickness	0.20"
Plastic Wall Thickness	0.55"
Power	730 W
Weight	11 / 13 lbs

Standard package includes

- Exact PipeCut 170 Battery Pipe Saw with Cermet THIN 140 installed
- Pipe support, 4 pcs
- Exact 18V 5.0 Ah Lithium-Ion Batteries, 2 pcs
- Battery charger, 1 pc
- Allen keys 2 mm and 5 mm
- Shoulder bag

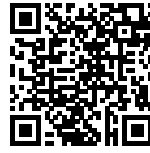

INOX 220

- Portable and handy
- Up to 10 times more cuts on stainless steel compared to previous solutions
- Laser pointer for precise cutting

Standard package includes

- Exact PipeCut 220 INOX pipe saw with INOX 140 saw blade pre-installed
- Pipe cutting supports 4 pcs
- Allen keys 2 mm and 5 mm
- Shoulder bag

BEVELLERS

- Uses the same unique, effective grip that ensures safety and provides highly precise results
- Exceptionally quick to install
- Precise adjustment capabilities
- Precise repeatability
- Beveling is as desired, regardless of the conditions

PipeBevel 220E

- Suitable for steel and stainless steel
- Pipe sizes of OD 1"-8" and up with a wall thickness of 0.4"
- Does not create flames or sparks
- Available in 30°, 37.5° and 45° cutting heads – sold separately
- Cutting tips (3 per pack) – sold separately

PipeBevel 360E

- Suitable for steel and stainless steel
- Pipe sizes of OD 4"-14" and up with a wall thickness of 0.4"
- Does not create flames or sparks
- Available in 30°, 37.5° and 45° cutting heads – sold separately
- Cutting tips (3 per pack) – sold separately

Standard package includes

- PipeBevel 220E beveler or 360E beveler
- Pipe support x 2
- Allen key 5 mm
- Shoulder bag

PipeCut Features

PipeCut P400 Battery – Cuts and bevels PVC at the same time

Capacity Range	2"–16"
Plastic wall thickness	7/8" Cutting, 5/8" Cut & Bevel
Voltage	18V 5.0 AH Lithium Ion
Weight	14 / 15 Lbs

- Standard package includes**
- Exact PipeCut P400 Battery
 - Pipe Saw with TCT P150 installed
 - Cut Bevel blade 148, 1 pc
 - Pipe supports single, 4 pcs
 - Exact 18V 5.0 Ah Lithium-Ion Batteries, 2 pcs
 - Battery charger, 1 pc
 - Allen keys 2 mm and 5 mm
 - Shoulder bag

PipeCut V800

Capacity Range	3"–31.5"
Max. wall thickness	0.6", 2.3 seam
Motor	8.4 Amp
Weight	13 Lbs

- Standard package includes**
- Exact PipeCut V800 pipe saw
 - Cermet V155 blade fitted to the machine
 - Allen key 5 mm
 - Shoulder bag

PipeCut P1000 – For HDPE and PVC Pipe

Capacity Range	2.3"–40" OD Pipes
Plastic Wall Thickness	2.9"
Motor	15 Amp
Weight	25 Lbs

- Standard package includes**
- Exact PipeCut P1000 pipe saw
 - TCT P-190 saw blade pre-installed up to 16" wall thickness
 - Pipe support 1 x big and 2 x small
 - Allen keys 2 mm and 5 mm
 - Shoulder bag
 - TCT P-250 blade cuts up to 2.9" wall thickness (not included)

HYDRA & HYDRA INFINITY

Designed for confined spaces, the HYDRA Saws are the superior solution for trench cutting – offering unmatched safety, control, and cutting performance.

When in-trench pipe cutting, the HYDRA Saw is unrivaled. Engineered to maximize safety, reduce labor, and deliver clean, precise cuts every time.

HYDRA Features

- Hydraulic saw ideal for cutting pipe in a trench
- Hydra 360 for 3"-14" pipe and HYDRA Infinity for pipe over 14".
- Easy to use in challenging conditions
- Cut safer, quicker, and more accurately on the job site
- Requires 12" clearance all around the pipe

PipeCut HYDRA 360

Capacity Range	3"-14"
Steel Wall Thickness	1"
Plastic Wall Thickness	1.7"
Motor	Max 6.6 GPM/ Max 2200 PSI
Weight	41 Lbs

PipeCut HYDRA Infinity

Capacity Range	14"-73" standard; 73"+ by adding chain segments
Max. pipe wall	1" steel, 1.8" plastic
Motor	Max 6.6 GPM/ Max 2200 PSI
Weight	59 Lbs

- Exact PipeCut HYDRA package includes**
- Exact HYDRA 360 / HYDRA Infinity machine
 - Two connecting hoses (39")
 - Exact Cermet 165 blade
 - Tools for changing the blade

PipeCut 360 Air

- Pneumatic Pipe Saw for 3"-14" pipe
- Requires 90 PSI / 140 CFM Air Compressor
- Cuts ductile iron with Diamond X165 blade

PipeCut 360 Air

Capacity Range	3"-14"
Cast Iron Wall Thickness	1.8"
Plastic Wall Thickness	1.8"
Motor	4.6 HP / 3.4 KW (when having max. pressured air flow)
Weight	59 Lbs
