DRY CEMENT TRANSFER

Hose, Fittings & Accessories

HOSE SOLUTIONS

- **Light-Duty (1/8" Thick Inner Tube) – SS135 Series**
Ideal for standard material transfer with strong abrasion resistance.
- **Heavy-Duty (1/4" Thick Inner Tube) – SS247 Series**
Built for high-volume, high-wear transfer applications.
- **Hot Air Blower Hose – SW360 DRAGON BREATH®**
For blower systems feeding cement into silos.

FITTINGS & ASSEMBLY OPTIONS

- **Cam & Groove Fittings**
- **Band-Clamped Transfer Hose Assemblies**
- **Crimped Hot Blower Hose Assemblies**
- **T-bolt Clamps for On-Site Repair**

DRY CEMENT TRANSFER SOLUTIONS

SUPPLEMENTAL SOLUTIONS FOR DRY CEMENT TRANSFER

Tan Gum Tubing (Dry Material Transfer)

Highly flexible, abrasion-resistant tubing ideal for dry bulk conveyance.

Heavy-Duty Suction & Discharge Hose

Engineered for severe abrasion environments and high-flow requirements.

Abrasion-Resistant Ducting Hose

Middleweight and kink-resistant ducting.

Dry Bulk Truck Components

Reliable pneumatic transfer solutions for cement, powders, grains, and other dry materials

WASHDOWN SOLUTIONS FOR CEMENT TRUCKS

Parker Factory-Made Assemblies

Consistent, rugged washdown assemblies ready for immediate use.

Custom Options Available

Heavy-duty Parker hoses in multiple colors, cut to custom lengths, with a variety of nozzle options.
